### **TrueBill Integrates with Ring Carrier**

#### ***Together they provide the most advanced Billing & Softswitch Solution***

**Los Altos, CA March 11, 2008** —TrueBill, award winning VoIP billing solution software, now integrates with Ring Carrier. "Ring Carrier can support hundreds of hosted Asterisk PBXs on a single PC delivering the most cost effective solution for network operators like an ITSP, LEC or CLEC VoIP telephony provider," said Paul Mahler, president of Ring Carrier. "The network solution will allow multiple Ring Carrier servers working together to support thousands of hosted PBX solutions and millions of endpoints".

"The integration to Ring Carrier demonstrates the flexibility, power, versatility, and speed of TrueBill through its design. Ring Carrier is the most advanced softswitch on the market and TrueBill handles the CDR seamlessly allowing the telephony providers to set up countless customer subscription plans which can utilize the various rates from any number of carriers," said Don Witt, president of Cylogistics about their TrueBill product.

"What makes this so significant for Ring Carrier," Paul Mahler continues, "is that TrueBill is very flexible and adaptable to the new billable technology that Ring Carrier will be introducing as a part of its total VoIP telephony solution over the next several months. Our customers now know that any new technology introduction by Ring Carrier will also be accompanied by the integration to TrueBill. This will allow our customers to take full advantage of the new features quickly and stay ahead of the market!"

There are a number of billing solutions, hybrid, hosted only, etc. Many of them are based on older technology and older designs that have not stayed current. We are pleased to partner with TrueBill because it is of modern design and because it will continue to offer Ring Carrier customers a solid billing solution into the future.

See Ring Carrier at the VON in the TelcoBridges booth number 1309. More product details are available at: [www.cylogistics.com](http://www.cylogistics.com)
